

Jurusan Teknologi Informasi Politeknik Negeri Malang

Jobsheet-7: Pengenalan JSON, penggunaan postman, Public API, Restful API, cURL

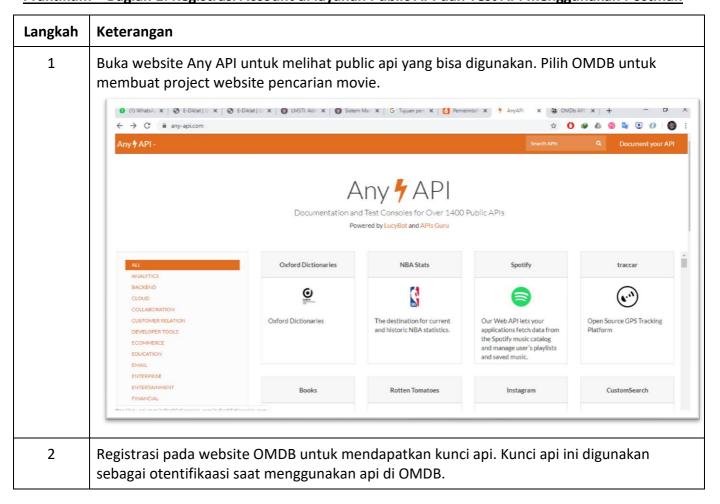

Mata Kuliah Pemrograman Web Lanjut

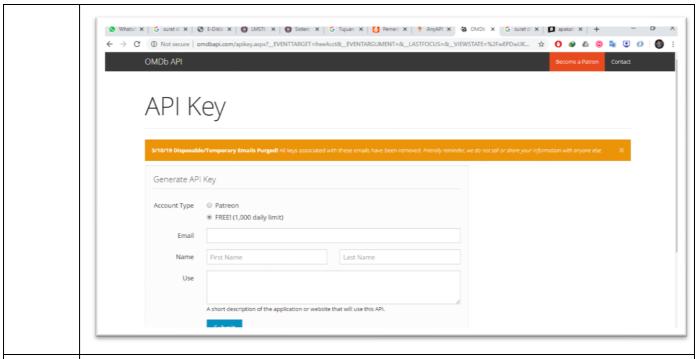

Pengampu: Tim Ajar Pemrograman Web Lanjut

Februari 2020

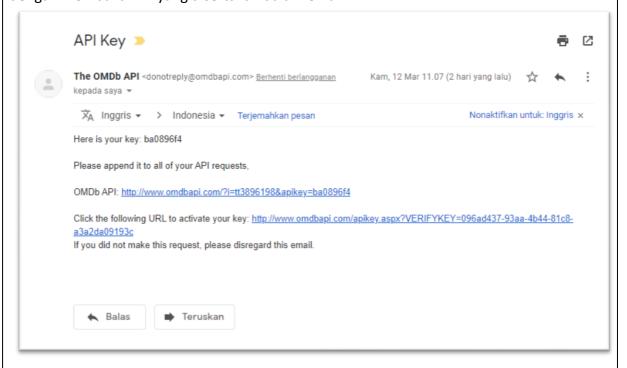

Nama : Agsal Fairrohmad A.P No : 04/TI2A

Praktikum – Bagian 1: Registrasi Account di layanan Public API dan Test API menggunakan Postman

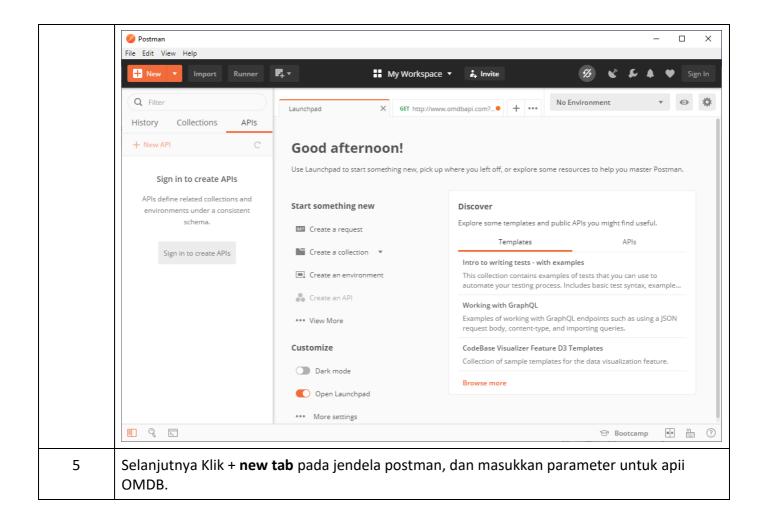

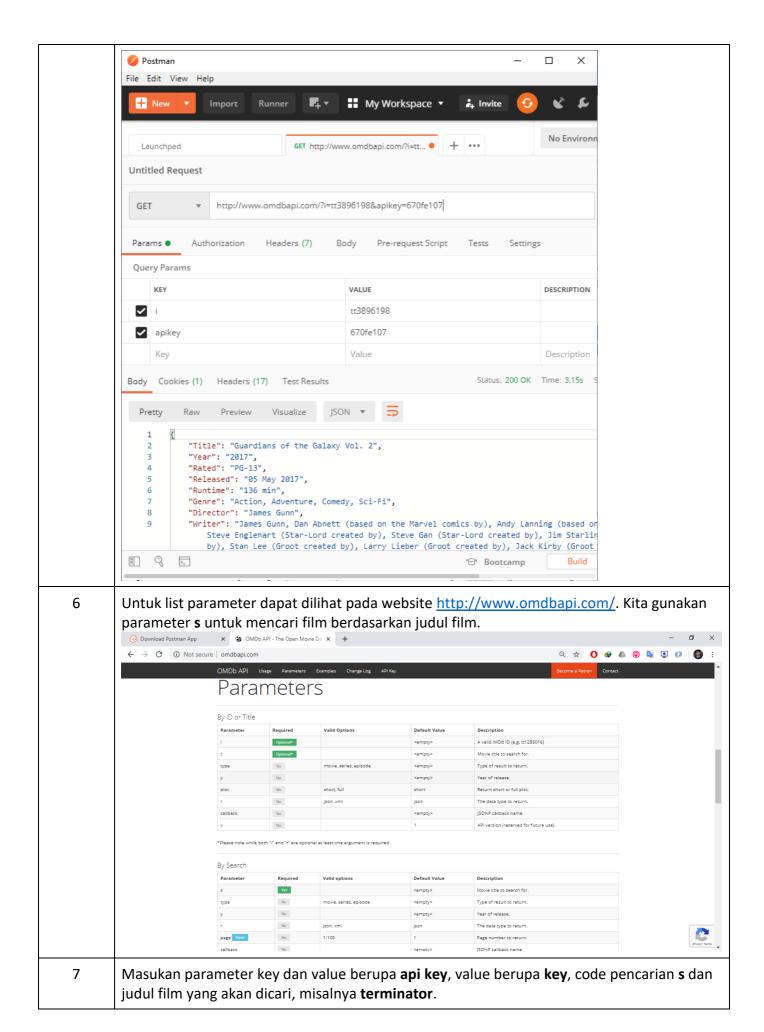

3 Selajutnya kita akan menerima email berisi kunci api, kunci api tersebut harus diaktifkan dengan membuka link yang disertakan dalam email.

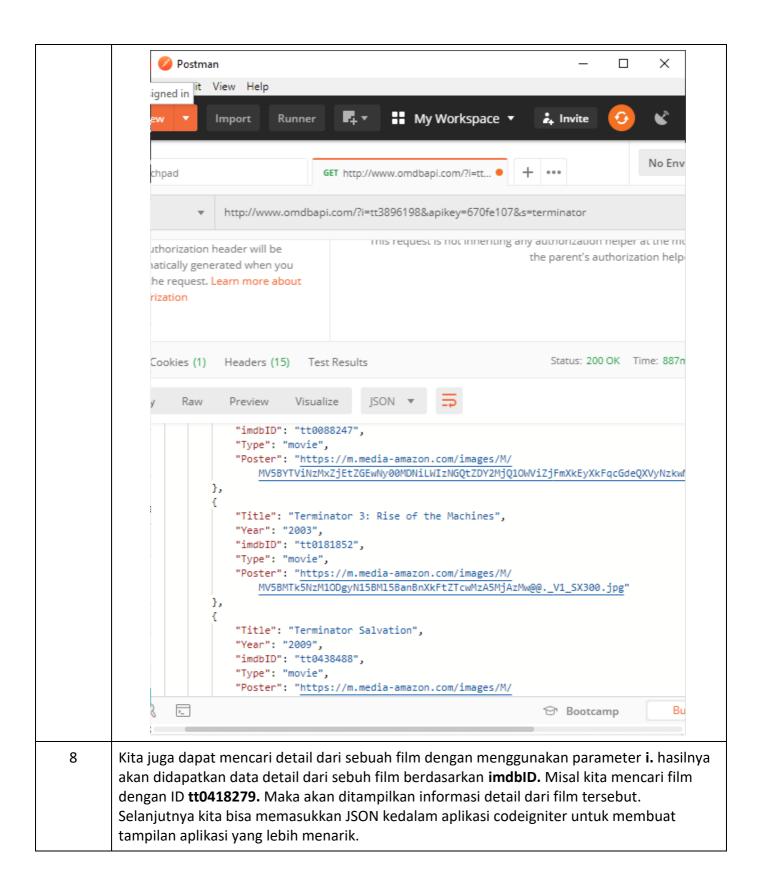

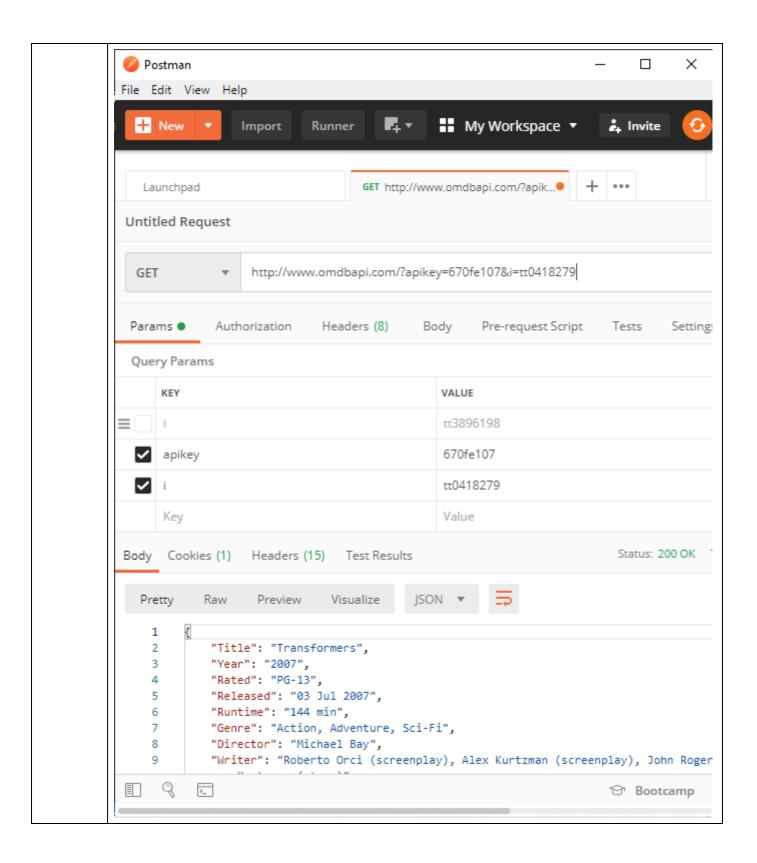

Setelah mendapat kunci api, kita dapat melakukan ujicoba kunci api tersebut dengan menggunakan aplikasi Postman. Sebelumnya lakukan instalasi aplikasi postman yang sudah didownload pada halaman https://www.postman.com/downloads/. Lakukan instalasi sampai selesai dan aplikasi postman dapat berjalan seperti gambar dibawah ini.

4

Praktikum - Bagian 2: Membuat Aplikasi Movie List Code Igniter Menggunakan Public API

```
Langkah
                                        Keterangan
            1
                                        Duplikasi Project Code-Ketiga dan berilah nama project Code-ketujuh
            2
                                        Lakukan perubahan konfigurasi $config['base url'] = 'http://localhost/rest-api/Code-
                                        ketujuh/'; pada config.php
                                                                            $config['base_url'] = 'http://localhost/rest-api/code-ketujuh/';
                                                       28
            3
                                        Buatlah sebuah file index.php pada folder view/movie/ dan tuliskan script seperti gambar
                                        dibawah ini:

√ views

                                                                > errors
                                                                > home
                                                                > login
                                                                > mahasiswa
                                                                movie
                                                                  💏 index.php
                                                                 > template
                                                                             Modal.modalfade > ❷ div.modal-dialog.modal-ig > ❷ div.modal-content > ❷ div.modal-footer
div class="row mi-3 justity-content-center">
(div class="rol.male": ol.male": ol.male": ol.male: ol.ma
```

                          header_login.php
                          m header.php
                         m biodata.php
7
          Tambahkan juga script pada header.php pada folder template seperti gambar dibawah ini:
```

```
header.php - Untitled (Workspace) - Visual Studio Code
              D
                                                       ⇔ header.php × ⇔ database.php

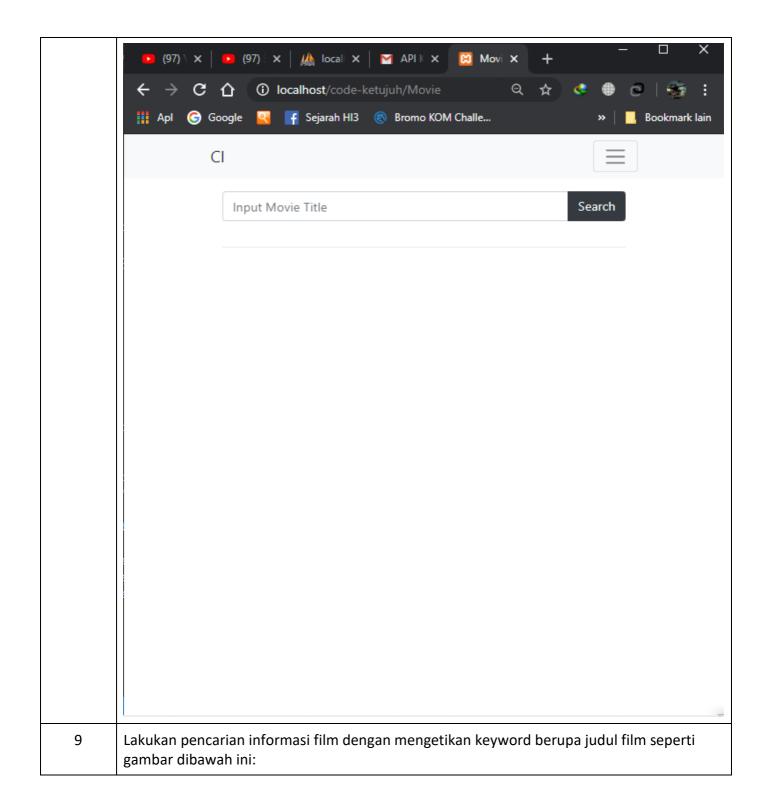

∨ UNTITLED (WORKSPACE)
